

Compiler Construction: Introduction

The Final Project Presentations

Rules and Regulations

NTMO, Spring Semester 2026

Topics to be covered by final presentations

- **Clear task description**

What and how should you do, what is the expected result.
Source & target languages, implementation language

- **Overall project architecture**

Major components and their interactions

- **Technology**

Bison/Handwritten parser, code generation/interpretation technique etc.

- **Major data structures**

Tokens, AST, intermediate representation

- **Results**

What's done, what's not (honestly 😊). Examples of key code. **Demonstration**

Final presentations: The procedure

- Duration: ~20 mins including demo
- All project team members should take part in the presentation
- The presentation should contain info about members' contribution
- The presentation should contain a link to the code base (GitHub or smth similar)
- The presentation slides (.pptx or .pdf) should be sent to the instructor on the day of presentation.
- Presentation time: see official announcement.
Come earlier: support your classmates, and avoid mistakes that they make 😊

The formula for the final grade (updated)

The grading formula:

Lexical analyzer report	13%
Syntax analyzer report	13%
Sem. analyzer report	13%
CodeGen/Interp report	10%
Final project presentation	11%
Project results (quality, readiness etc.)	50%

The Final Grade

- $\geq 90\%$ 5
- 80-89% 4
- 60-79% 3
- $\leq 59\%$ Fail
